Visit to Museo ArteVino Razzano

The Museo Razzano ArteVino was inaugurated in October 2009 and is located within the Tenuta Castello di Razzano estate.

The project, conceived by owner Augusto Olearo, was realized thanks to the collaboration with Silvio Manzotti, an artist expert in Monferrato's rural culture and traditions.

Visiting the museum is an exciting and informative experience. Guests can explore the exhibition spaces freely, at their own step and according to their interests, with the assistance of an informative guide provided at the entrance.

Visitors can relive the past, following a historical journey tied to the local rural tradition, capturing the traces of time hidden among details large and small. A "dive" into the world of winemaking of the past, reaching the late 17th-century aging cellars still in use today.
